

Kaung Myat Soe

(React Developer)

SKILLS

- Hard skills :
 - JavaScript/TypeScript
 - [REACT.Js](#)
 - [NEXT.Js](#)
 - Ant design
 - Mantine UI
 - Chakra UI, etc..
 - HTML/ CSS
 - React Query
 - Zustand
 - Tailwind
 - GitHub
 - REST APIs
 - Responsive
 - Firebase.
- Soft skills :
 - Communication
 - Time Management
 - Teamwork
 - Self-motivation
 - Problem solving.

Work experience

1. Digital Base (React Developer)

• Duty & Responsibilities

I. Core Development and Code Quality

- **TypeScript Implementation:** Develop robust, scalable, and maintainable user interface (UI) features using React and TypeScript to ensure code stability and catch errors during development.
- **Component Development:** Design and build high-quality, reusable UI components, leveraging styling and component libraries such as Ant Design and Mantine.
- **Code Review and Standards:** Actively participate in the code review process, providing constructive feedback and ensuring all code adheres to team standards and modern React best practices.
- **Performance Optimization:** Proactively identify and resolve performance bottlenecks, applying techniques such as code splitting, React Memo, and virtualized lists to ensure optimal application speed and responsiveness.

II. State and Data Management

- **Global State Management:** Implement, manage, and maintain application-wide state using Zustand, focusing on simplicity, testability, and centralized logic for complex application flows.

- **Efficient Data Fetching (React Query):** Utilize React Query for API communication, focusing on automatic caching, normalization, and optimization of data fetching processes to significantly reduce redundant server requests.
- **API Integration:** Integrate the front-end application with backend RESTful APIs using Axios, ensuring reliable and secure data transfer and comprehensive error handling.

III. Project Execution and Collaboration

- **Feature Ownership:** Take ownership of developing key features for large-scale internal projects, including the HRMS (Human Resource Management System) and complex Point System/Wallet applications (similar to Pocket MM).
- **Cross-Functional Collaboration:** Collaborate closely with UI/UX designers, back-end developers, and project managers to define technical requirements, ensure design fidelity, and align integration timelines.
- **Agile Proficiency:** Participate actively in Agile/Scrum ceremonies (stand-ups, sprint planning)

IV. Project-Specific Focus

- **HRMS Focus:** Develop secure and user-friendly interfaces for sensitive HR functionalities (e.g., leave management, payroll, and employee data management).
- **Point System Focus:** Implement highly transactional UI flows for the point system, focusing on real-time updates, security, and a seamless user experience for balance and transaction history views.

Projects

1. Mini GlassDoor - Next/Firebase

Web - <https://clarity-career-orpin.vercel.app/dashboard>

Source - <https://github.com/lizzy-km/clarity-career>

- Key Features:
 - Find Jobs:** Search and apply for hundreds of job listings across various industries.
 - Company Reviews:** Get the inside scoop on company culture, work-life balance, and more from real employees.
 - Salary Insights:** Compare salary data for different roles and companies.
 - Interview Experiences:** Prepare for the next interview by reading about others' experiences.
 - Share Your Knowledge:** Anonymously contribute own reviews, salary data, and interview experiences to help the community.
- For Everyone:
 - Employees:** Find a job, research companies.
 - Employers:** Post job openings, manage applicants, and build the company's brand to attract top talent.

2. The Movie database Clone

Web - <https://themoviedb-org.vercel.app/>

Source - <https://github.com/lizzy-km/themoviedb-org>

3. Figma Plugin (Design to Code)

Source - <https://github.com/lizzy-km/LazyMode>

- Can be able to generate React functional component code from Figma design (every single frame except SVG)

EDUCATION

Government Technical Institute, Myingyan — Electronic & Communication

2018 - 2020

Government Technical High School, Taungoo — Electronic & Communication

2016 - 2018
